

PLANT
SUPERVISOR

THE EFFICIENCY OF YOUR MOVING
PLANT IS NOW IN YOUR HANDS.

DISCOVER THE BEST SOLUTION TO MAXIMIZE PRODUCTION AND MINIMIZE WASTE.

To get the maximum value from a moving plant, you need to have complete control over everything that happens during processing, from the speed of the chain or conveyor belt, to the position of the parts in production to the visualization of the jobs scheduled for the working day.

Plant Supervisor is the tailor-made platform **for all SMEs** that own motion systems and want to optimize their production.

ECONOMICAL AND ROBUST

Use the most compact solution on the market and within reach of all SMEs: thanks to its best technologies, it guarantees you always display the information you want accurately.

HIGH-QUALITY OVER TIME

Create a new standard of excellence for your production: thanks to artificial intelligence and modern Machine Learning algorithms, you produce only quality parts while reducing waste of damaged material.

THE WINNING SOLUTION

To face up to future challenges, even the smallest piece of information can make a difference: thanks to the platform, the digitization of moving plant data becomes precise and your company immediately improves efficiency, maintaining it over time.

MAXIMUM FREEDOM

Dedicating yourself to your work is the first step to be more productive because you always have the guarantee that Plant Supervisor controls your plant in real time, notifying you of any anomaly found.

SMART TRACEABILITY

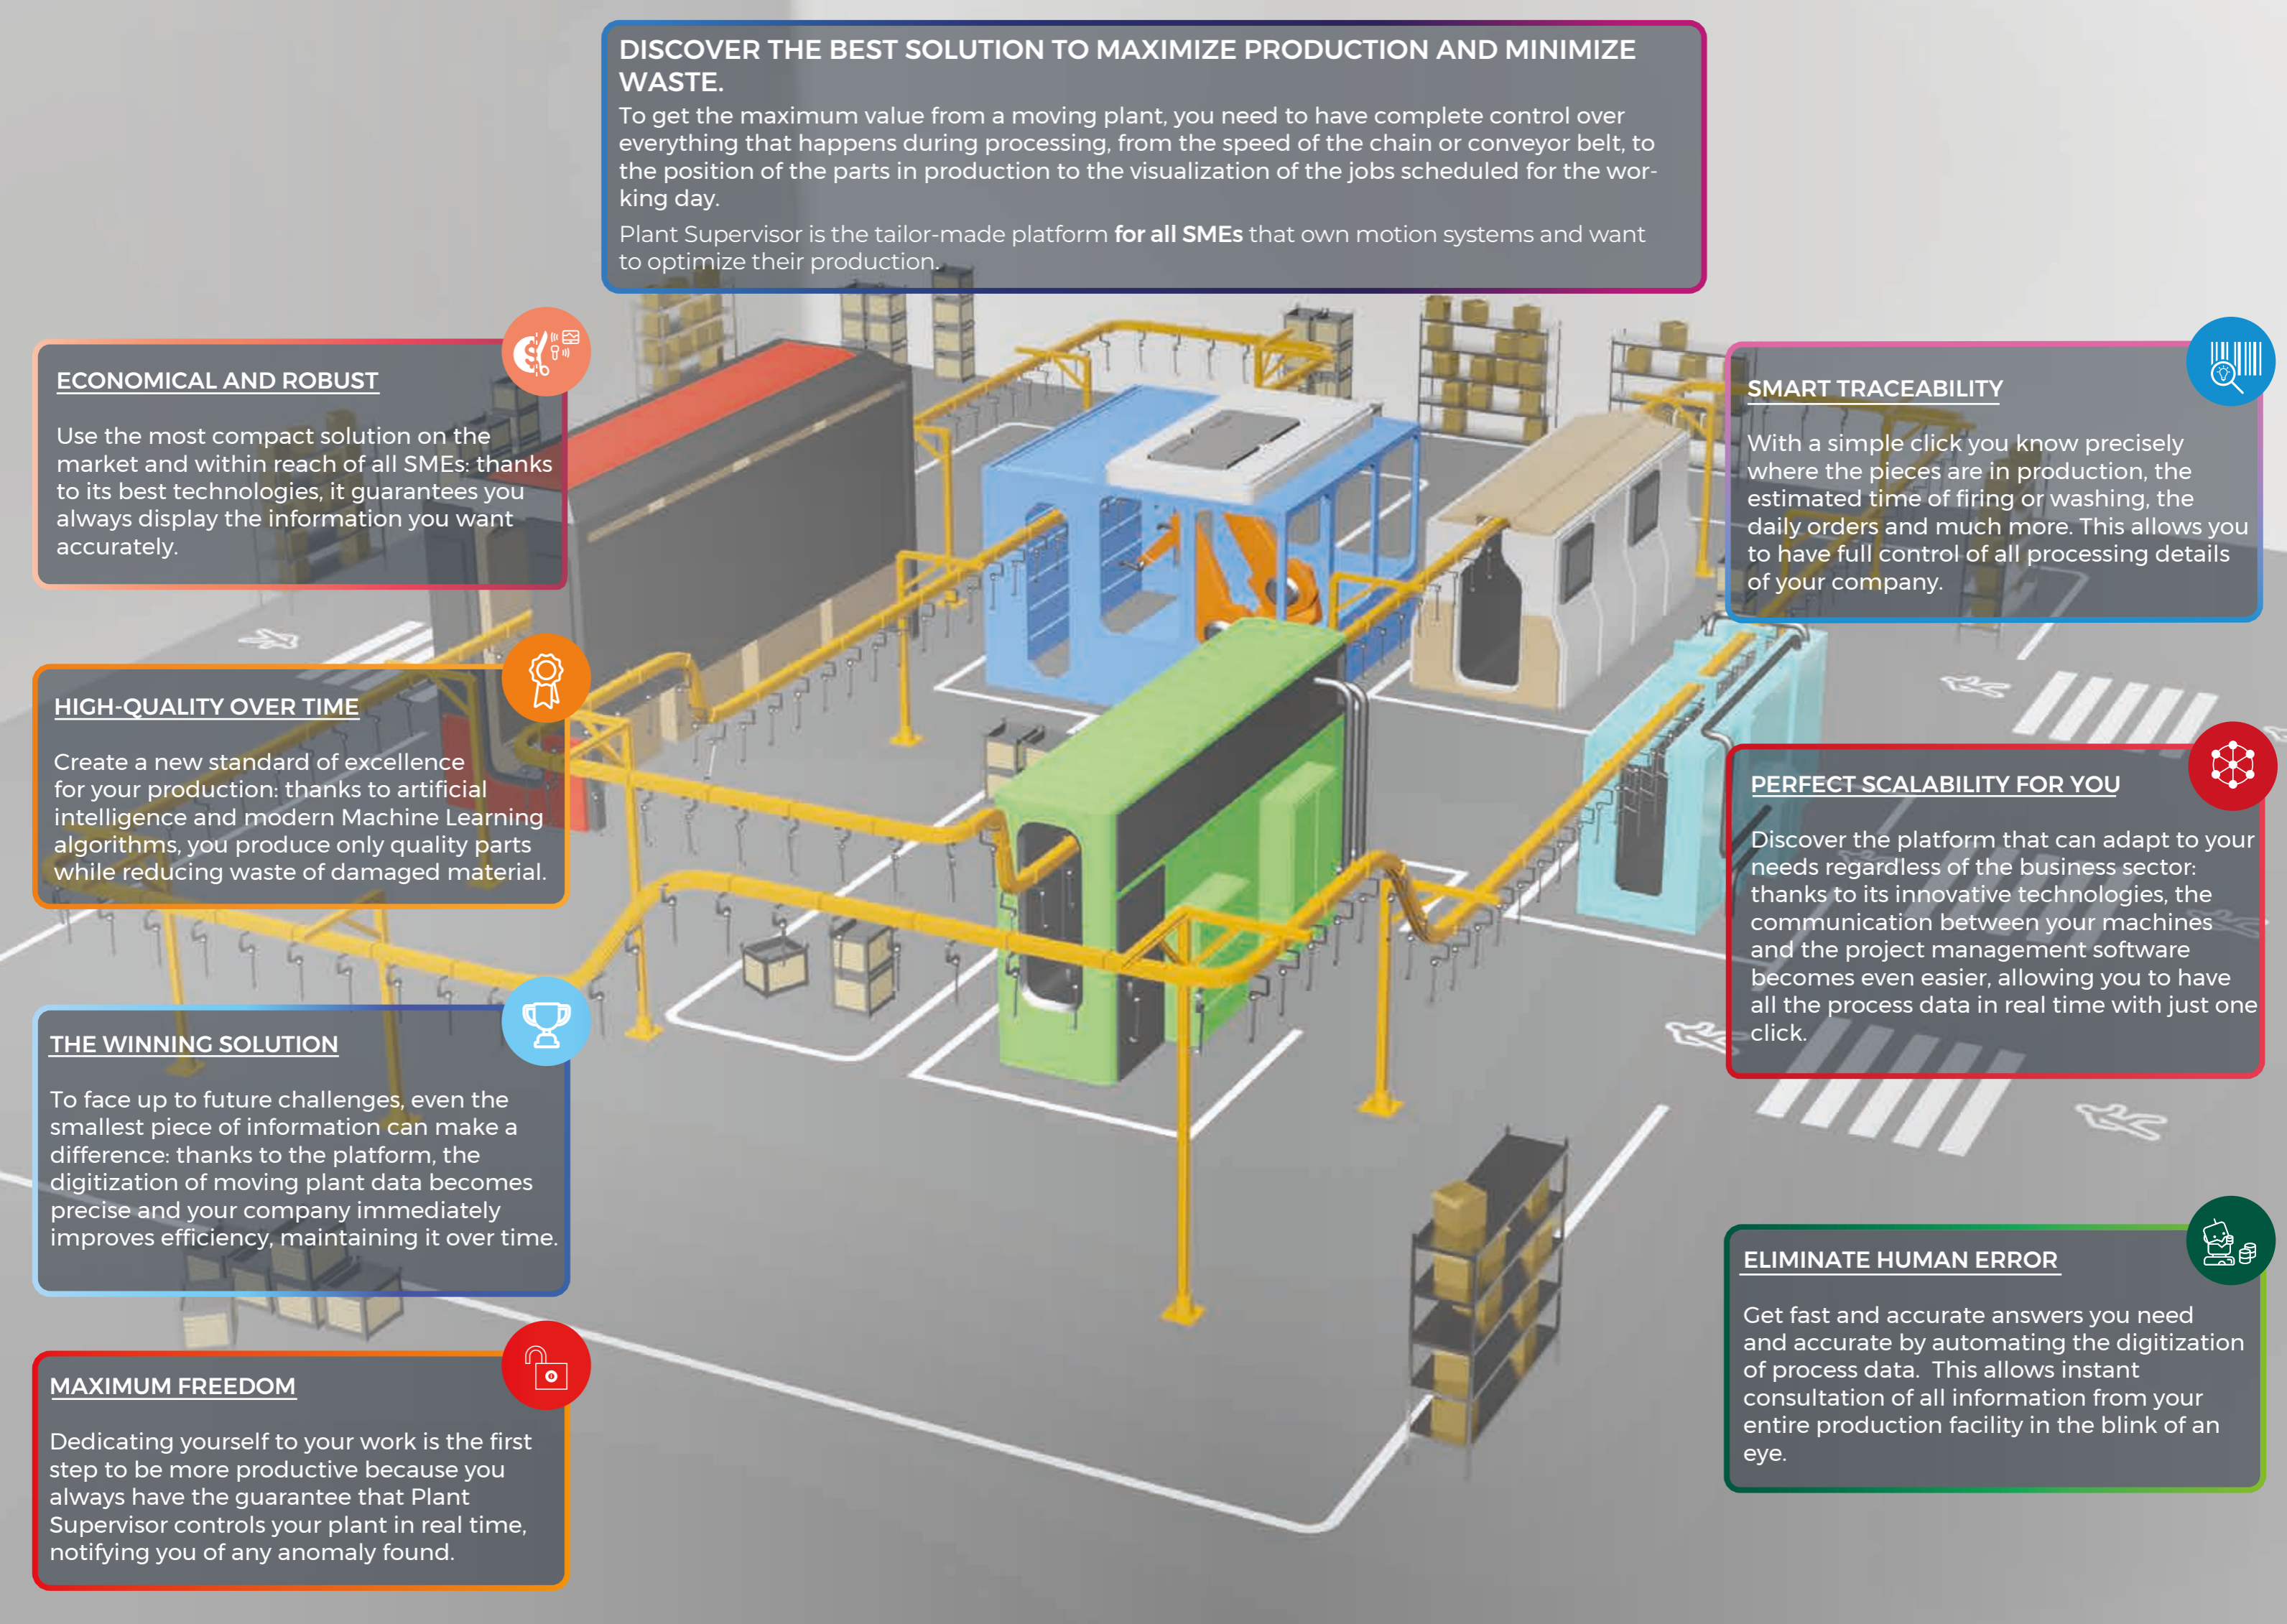

With a simple click you know precisely where the pieces are in production, the estimated time of firing or washing, the daily orders and much more. This allows you to have full control of all processing details of your company.

PERFECT SCALABILITY FOR YOU

Discover the platform that can adapt to your needs regardless of the business sector: thanks to its innovative technologies, the communication between your machines and the project management software becomes even easier, allowing you to have all the process data in real time with just one click.

ELIMINATE HUMAN ERROR

Get fast and accurate answers you need and accurate by automating the digitization of process data. This allows instant consultation of all information from your entire production facility in the blink of an eye.
