## WHAT IT IS THE SMART FACTORY

It is a new model of industry that uses new production technologies to improve working conditions and increase the efficiency of the plants and the quality of products and work.

## WHAT IT IS IDAQ ANALYTICS

iDag Analytics allows a 360° view of the production process thanks to the strategic approach of data analysis, starting from raw data up to the visualization and processing of data.

Customize dimensions, metrics, calculations; thanks to its intuitive interface it is not necessary to write lines of programming.

iDag Analytics is the ideal platform for companies that want a simple solution to seize new opportunities for growth and improvement.

## CAREFULLY CREATED

iDag Analytics was born from the synergy between Welol and TOOLS for SMART MINDS.

Welol Next, Microsoft Gold Partner for cloud solutions development and Data Analytics, helps its customers to derive value from their data through the most innovative technologies made available by the Microsoft Azure ecosystem.

TOOLS for SMART MINDS - T4SM - is specialized in the research and development of software for data collection and analysis and customized solutions for the industries of the Automotive, Aerospace, Mechanics, Energy & Infrastructure, Food & Beverage sectors.
