

INDUSTRY 4.0 PACKAGE

We provide you with the most secure solutions to connect your machines and make your production more efficient.

Interconnects any machine, regardless of age, brand or technology supported.

It monitors all production information in real time to **optimize the entire production process**.

It satisfies three 4.0 requirements: machine status control, data historicization and integration with factory information systems (project management software, erp, mes).

**PART PROGRAM
MANAGER**

Manages the master data of your articles and the **configurations of the workings** differentiated by machine and by article.

It allows you to **reduce errors** due to the transcription of orders on paper.

It satisfies an **additional 4.0 requirement**, namely the sending of data to the machine.

Choose the right partner for your 4.0 transformation
